

THE ARCTIC PIVOT

SOVEREIGNTY, SECURITY, AND THE BATTLE FOR THE NORTH

INTELLIGENCE DOSSIER // AN ANALYSIS OF THE 2025-2026 US-GREENLAND ANNEXATION CRISIS

Mineral Gold
#CCA43B

ESTIMATED UNDISCOVERED RESOURCES IN THE ARCTIC:

- OIL: 90 BILLION BARRELS
- NATURAL GAS: 1,670 TRILLION CUBIC FEET
- RARE EARTH MINERALS: CRITICAL DEPOSITS

STATUS: ACTIVE // SITUATION REPORT AS OF JANUARY 2026

EXECUTIVE SUMMARY: THE FLASHPOINT

JANUARY 2026 SITUATION ROOM BRIEFING

THE COMPETING NARRATIVES

US STANCE

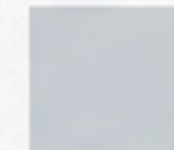

National Security Priority. Commercial acquisition strategy. “Might makes right” geopolitical positioning.

GREENLAND STANCE

“We are not Danes. We are not Americans. We are Inuiaat Kalaallit.” — Foreign Minister Vivian Motzfeldt.

DEFENSE REALITY CHECK

Perceived Investment

 Myth: undefended

**SECURITY VACUUM
MYTH DEBUNKED**

Actual Commitment

\$4.2 BILLION

Danish Arctic Security Increase, Oct 2025

\$4.5 BILLION

Acquisition of 16 Additional F-35 Jets

TIMELINE OF ESCALATION

2024 – 2026: STEPS TO THE PRECIPICE

Situation Room Red

Strategic Slate

KEY INSIGHT: The March 2025 election functioned as a de facto referendum, delivering a unanimous rejection of the US offer across the political spectrum.

THE HIDDEN DRIVER

WHY GREENLAND? WHY NOW?

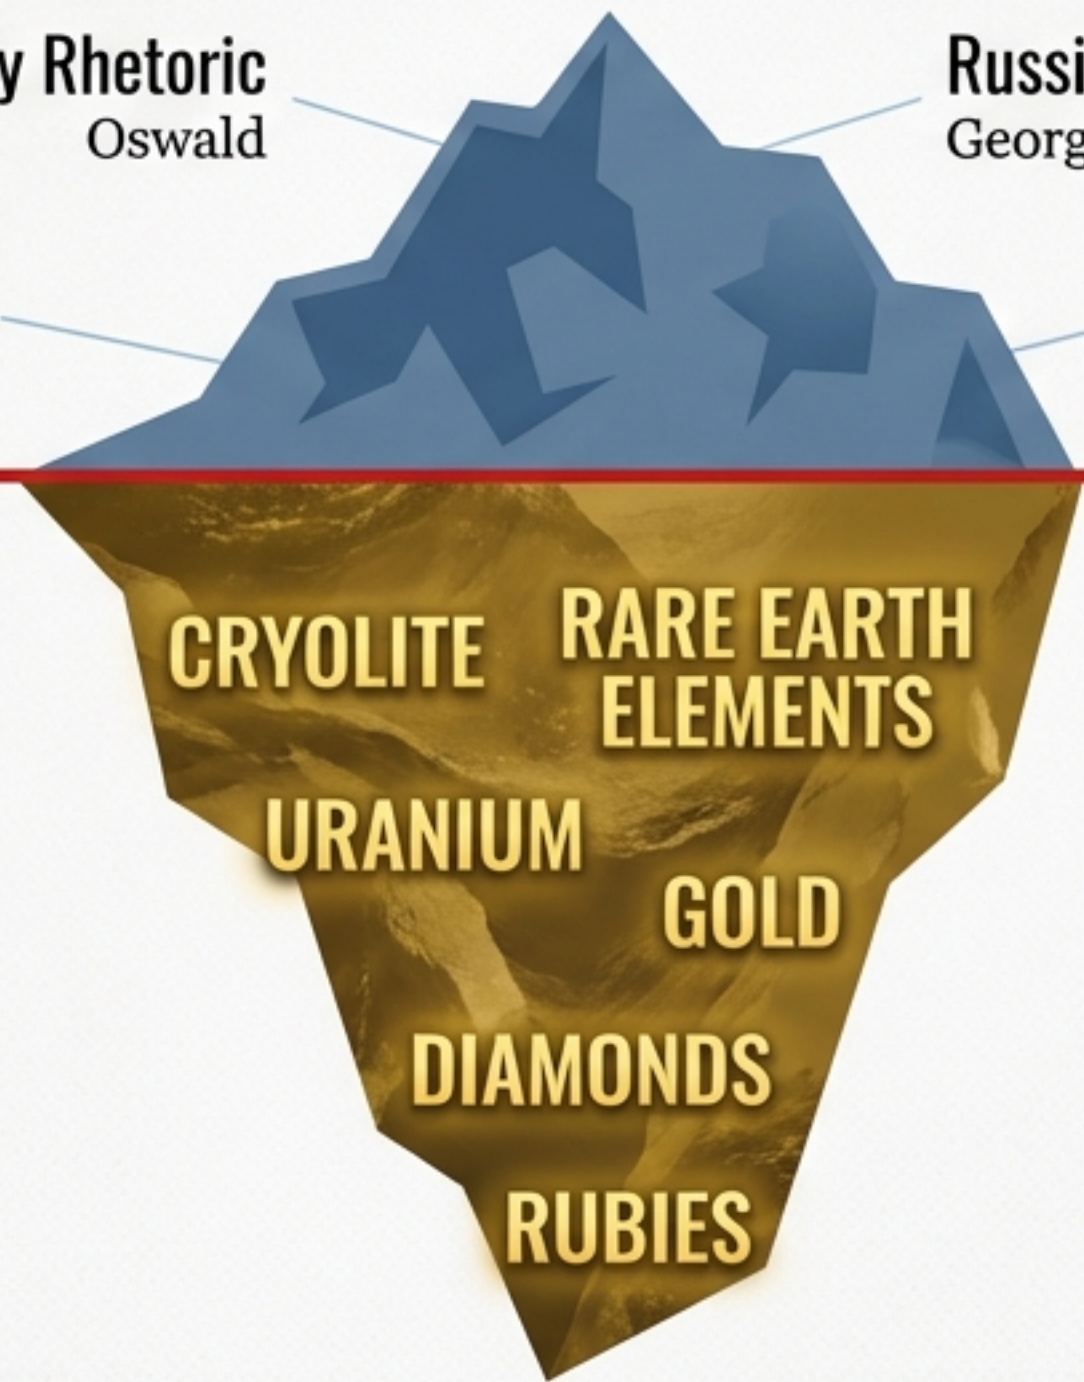

National Security Rhetoric

THE 'WHITE GOLD' LEGACY

HISTORICAL PRECEDENT: THE IVITTUUT MINE (1856–1987)

Cryolite was essential for aluminum production. During WWII, Greenland hosted the only active Cryolite mine in the world. This single resource fueled the construction of Allied warplanes, establishing Greenland as a critical component of the US defense industrial base.

TOTAL PRODUCTION: 3.7 MILLION TONNES

JetBrains Mono

From 1941 to today, US air power has relied on Greenland's geology.

THE MODERN TREASURE MAP

CRITICAL MINERALS & RARE EARTHS

BEHRREKRT
LAST NAME: _____
DATE _____

STEENSTRUPINE

Mineral Gold

Carrier of Uranium and Rare Earths. Vital for energy and defense.

EUDIALYTE

Mineral Gold

Primary ore for Zirconium. Nuclear cladding and ceramics.

TUGTUPITE

Mineral Gold

Fluorescent gemstone. Unique to the region.

DATE: OCT 26, 2023

ECONOMICS OF INDEPENDENCE

HIGH-VALUE ASSETS: GOLD, DIAMONDS, RUBIES

GOLD —

Nalunaq Gold Mine. Opened 2005.
Visible gold veins.

DATA POINT: 2005 PRODUCTION START //
PROVEN RESERVES: SIGNIFICANT

DIAMONDS —

Kangerlussuaq. 2.39-carat diamond
found in 2006.

DATA POINT: 2.39 CARAT FIND //
EXPLORATION PHASE: ACTIVE

RUBIES —

Fiskenæsset. Extensive gem-quality
deposits.

DATA POINT: GEM-QUALITY DEPOSITS //
MARKET POTENTIAL: HIGH

STRATEGIC IMPLICATION: These resources support a viable path toward economic self-determination, contradicting the narrative of dependency.

THE COMPETITORS

GREAT POWER FICTIONS VS. REALITIES

Fact Check

CLAIM	REALITY - RUSSIA	REALITY - CHINA
"Greenland is covered with Russian and Chinese ships."	Focus on Shelf Rights and Law of the Sea. No naval aggregation in Greenland waters.	pursuing "Polar Silk Road" and minerals. No sovereign claims.
CONCLUSION	The threat is exaggerated to justify the "Red, White, and Blueland" bill.	

STRATEGIC IMPLICATION This narrative distorts the actual geopolitical landscape, diverting focus from genuine strategic challenges.
